AE LARGE CELL FULL BLACK
MONOCRystalline PV MODULES
AE HM6-60 Series 315W-330W

60 CELLS

Temperature
Hot spot temperature lower than 85°C
The IEC61215 test shows that with a zero percentage, a small and a 100 percentage of shaded area, respectively hot spots will not exceed 85°C, which is the maximum operating condition.

Reliability
Bypass diodes prevent cells mismatching at shaded areas. The lower temperature of hot-spot free modules will eliminate potential cause for back sheet degradation, hence enhancing reliability for longer term.

Safety
Instantly reduced temperature, thus eliminating material hazard and ensuring more safety of the module, preventing fire risks caused by hot spots.

German Quality
AE Solar photovoltaic modules are produced using high quality materials, automated robotic lines, German technology and standards.

Performance Guarantee
AE Solar assures high investment, security and warranty claims by providing linear performance guarantee of 30 years and 12 years of product warranty.

High Returns
This new technology prevents instant falls in the module output, thus increasing the performance ratio up to 30% and return for all types of installations.

Plus-sorting
Higher yield due to plus-sorting from 0 up to +5 Wp guarantees the high system efficiency and yield stability.

Certificates
Lining with international standards, AE Solar Photovoltaic modules are tested and certified under extreme stress conditions and it can bear harsh environment influences.
